## WHY EURO MASTER EVOLUTION

### EXPERIENCE, FLEXIBILITY AND INNOVATION

The passion for the research, quality and innovation of an artisan; the technology and production capacity of an industry: for this reason, for over 40 years, customers choose us.

Our products are distributed all over Europe for the leading manufacturer companies of transportation and handling fields.

Thanks to the flexibility of our production departments we are able to manage a custom production programming and we are the ideal partner also for small production series.

## CUSTOMER SERVICE

When you are looking for solutions of **thermal and acoustic insulation** for locomotives and carriages and for the **interiors**, we are the partner can support you from design to production.

- The **Research & Development** dept. interprets your needs and offers innovative materials and solutions that can meet the requests of your technical office
- The **Thermoforming** hot and cold dept. works for you on a wide range of sound-absorbing and thermo insulation materials.
- The **Sewing dept.** realizes seams on different types of material (from technical fabrics, PVC coated fabrics and glass-fiber fabric, leather, ...) also with thermal seaming solutions.

## SPECIFIC SOLUTIONS FOR THE RAILWAY INDUSTRY

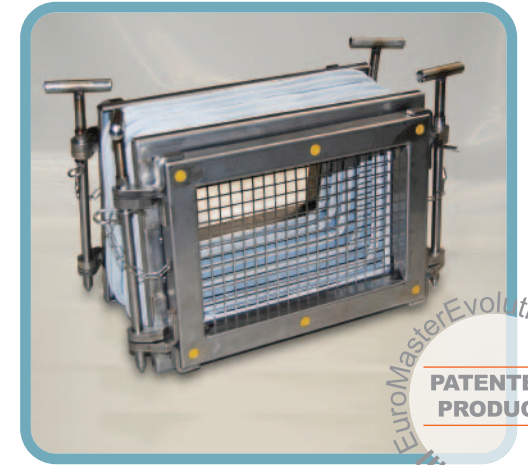

### Engine cooling bellows:

**A unique product that saves time and maintenance costs.**

Thanks to the patented solution, the bellows can be replaced easily without the relocation to the specialized workshop.

**The easier extraction and replacement reduces the locomotive downtime and the maintenance costs.**

The Euro Master Evolution bellows have already been chosen by major international railways companies.

Engine cooling bellow

- Roller blinds
- Sliding curtains
- Seat, headrest and armrest covers
- Engine cooling bellows, connecting bellows, protection bellows realized in fabric according to the railway sector rules
- Sleeves air conveyor for air conditioning system, realized with an exclusive patented glass fibers fabric coated PU and according to the railway sector rules
- Upholstered soundproofing panel and soundproofing components for the internal structure
- Heat shields for engine compartment

Sleeves air conveyor
